

AI Trailer™

Cargo Omniscience Solution

Reduce operating costs and increase margins with a holistic trailer and cargo management system. Without real-time cargo status, resources are wasted through inefficient load bookings, misdirected drivers, and unnecessary cargo checks. This lack of control extends to cargo transport and handling at customer locations. Active cargo monitoring inside trailers can solve these issues.

All Visibility in Space, Time and Conception.

Yard management

- ✓ Trailer inventory status: % Filled, Empty, Out of service.
- ✓ Dormant trailer tracking: re-deploy empty unpowered trailers, or recover filled idle trailers used just for storage.

Dispatching

- ✓ Use AI for smart LTL and TL load decisions.
- ✓ Capture manual or event-based photos (Loaded, Unloaded, Parked, Cargo tipover).
- ✓ Engage drivers effectively by directing them to the right trailers without status calls.
- ✓ Manage loading process for proper front-rear load distribution and correct loading.

Transporting

- ✓ Ensure safe transport with GPS and alerts for cargo status, temperature, and humidity.
- ✓ Enhance security with instant theft alerts for unauthorized door access.
- ✓ Automatically detect and resolve cargo issues with photo evidence.

Financial Controls

- ✓ Optimize purchasing decisions with trailer utilization data.
- ✓ Reduce costs and improve margins through better trailer and driver management.
- ✓ Save on insurance with cargo damage and theft protections.

Delivery

- ✓ Manage detention with arrival, loading/unloading, departure data and photos.
- ✓ Resolve complaints with shipped and delivered cargo photos.

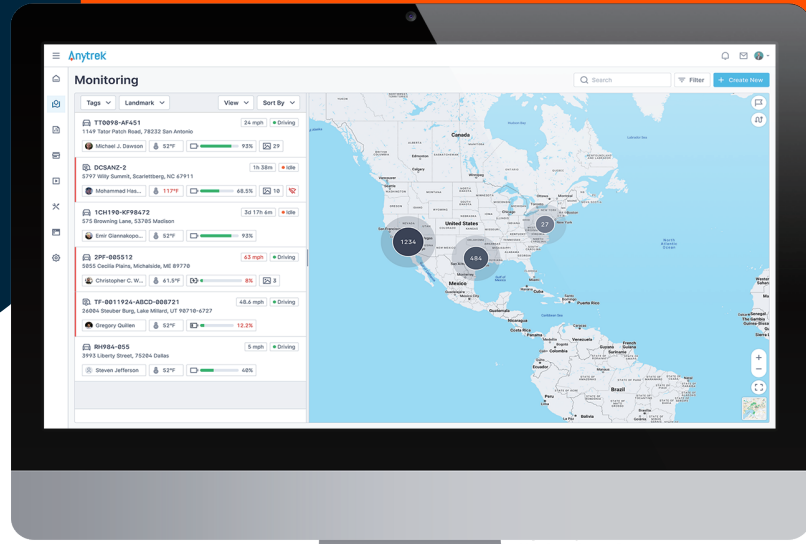

* The system also acts as a gateway to various sensors such as temperature sensors and door sensors for theft prevention.

AnyFleet Pro

Visualize, Monitor, and Control Your Assets Anytime, Anywhere.

Our Web Portal has many Features to help you improve the efficiency of your Business.

Anytrek's Anyfleet Pro web platform is designed to help you effectively manage your fleet operations to reduce costs and improve productivity. We save customers' data securely and make it available anytime.

Manage Your Assets with Accurate and Insightful Data

Vehicles

- ✓ Use dashboards to monitor fleet KPIs, track real-time GPS locations, and report on % Idle and % Utilization.
- ✓ Ensure timely maintenance with automatic service reminders, and monitor KPIs like maintenance due, breakdowns, and average downtime.
- ✓ Optimize new purchases based on truck and trailer utilization reports

Drivers and Safety

- ✓ A comprehensive system to enforce fleet safety with dynamic scorecards for drivers and teams to drive improvements.
- ✓ Live dashboard keeps you informed about harsh drivers, speeding incidents, accidents, near misses and etc.
- ✓ Access trip video and pictures for training and management.

Compliance

- ✓ Automated system to ensure fleet compliance to regulations.
- ✓ Act on real-time HOS violation alerts
- ✓ The HOS dashboard helps reduce the occurrence of violations
- ✓ DVIR dashboard provides comprehensive insights into fleet overall health and maintenance status
- ✓ Ensure timely IFTA payments

Security

- ✓ A unified system to achieve high levels of trailer and cargo security.
- ✓ Access instant cargo theft alerts from any trailer in the fleet.
- ✓ Generate summaries on cargo safety, highlighting the number of unsafe cargo transports and average detention times
- ✓ Landmarks and Geofencing

Other features

- ✓ Access information alerts sent via phone and email
- ✓ A multi-sensor supported intelligent truck ecosystem
- ✓ 24x7 remote support
